

# Your Program Design & Implementation Partner

*National Disaster Resilience Competition: Phase 2 and Beyond*

## what we do

TDA Consulting, Inc. helps communities develop their full potential. We provide high-quality consulting and training services that enhance the capacity of client organizations to achieve their community development goals while consistently exceeding their expectations. Our direct experience in disaster response, recovery and resiliency across the country is reinforced by our reputation as a premier consulting practice that is nationally recognized and grounded in our understanding of and commitment to the needs of local and regional markets.

## who we are

TDA Consulting is a national community development consulting firm with more than 15 years of specific expertise in HUD programs, including Disaster Recovery funded under CDBG-DR and the Disaster Housing Assistance Programs (DHAP).

Our team, based in 14 cities across the country, has worked with communities and states impacted by Disasters from Katrina through Sandy. Since 2011, we have worked directly on these programs with:

- *The State of Connecticut*
- *The State of New York*
- *The State of Pennsylvania*
- *The State of Florida*
- *The State of Oklahoma*
- *The City of Moore (OK)*
- *The City of New York (NY)*

## working in partnership

TDA recognizes the value of partnership and brings a team of engineering, resilience and compliance partners that are available to you as needed. We also recognize the value of local engineering expertise and understanding local needs, and will work with your existing local team to maximize all contributions.

## how we help phase 2 applicants

As your partner, we bring a team of national experts to work with your local team to answer the following questions:

- What does Resilience look like for your Phase 2 Application?
- How do we present these Projects to HUD to maximum competitive advantage?
- What do you plan for now that will assist with implementation once awarded?

## preparation of the application

1. Assist in designing and implementing a process that **results in projects that meet the HUD selection criteria** for funding.
2. Conduct **Benefit Cost Analysis** of proposed projects in accordance with HUD standards.
3. Strategically **optimize components of the application** to best position your team for a high score on the NDRC Phase 2 rating factors.
4. **Manage the application process** through completion and submission.

## ongoing compliance & program management services

When HUD funds your Phase 2 application, TDA will assist you with CDBG-NDR compliance and program management services. Our expertise in compliance, program management, and reporting systems will help you achieve program goals and bring projects in on-time and on budget. We can help manage the CDBG-NDR process from Action Plan through Closeout:

1. Development of **work plans** and if needed, waivers that meet HUD criteria for approval
2. **Procurement** and subrecipient/contractor contracting services
3. **Training** and written guidance for subrecipient/contractor management
4. Ongoing project and program management
5. Funding coordination and draws with HUD
6. Production and operation reporting to HUD and stakeholders
7. Management of citizen participation process
